

We hire UAV Technicians

Company Description

Jedsy is a revolutionary technology startup based in the heart of Europe with a vision to become the world's leading company for drone deliveries. We specialize in the design, development and implementation of commercial drones. We want to make last-mile logistics greener, more sustainable and more efficient for our end consumers. Our technology solution is applicable to medical, private and commercial areas.

Job Description

Your mission during this flight:

As a Mechanic within the Flight Test team, you will be an essential part of the Maintenance team from preparation, prototyping to implementation and reporting. Moreover, you will take part in the preparation of deployment of the JedsyDrone in operations.

- Development, design and manufacture of aircraft (mechanics, electronics)
- Pre-flight inspection, flight preparation
- Perform functional troubleshooting and contributing to problem-solving
- 3D design, 3D printing, prototyping, soldering, assembly, mounting, and wiring of electronic subassemblies for drones
- Mechanical assembly of drone device components
- Construction of drone components

Qualifications

Check in your professional skills:

- You have experience in Electromechanics
- You are interested in RC Modelling and manufacture of aircraft (mechanics, electronics)
- You have knowledge in soldering and mounting of electronic assemblies
- You are a communicative team player and have organizational and implementation power
- You have a responsible, initiative and solution-oriented way of working
- Knowledge in 3D printing would be of advantage

Additional Information

Our flight includes:

- Fast-growing high tech company with a supreme network of investors and partners
- Ability to contribute directly to the future of aviation
- The chance to build up new things/projects from scratch
- Personal accountability, growth and learning opportunities, based on your personal strengths

Our differences make us stronger. At Jedsy, we value equal opportunity, trust, and the voice of each of our employees. As change-makers in air mobility, we believe that changing the world starts within each of our teams. We are committed to driving innovation by celebrating diversity and fostering an inclusive culture where everyone is treated equally and respectfully, regardless of our different backgrounds and roles in the company.

Fasten your seat belt and take-off with an awesome team as we bring delivery up in the sky!
